KLA INSTRUMENTS ANNOUNCES SECOND QUARTER OPERATING RESULTS

SAN JOSE, California, January 19, 1994 -- KLA Instruments Corporation today reported second quarter sales of \$57,087,000 and net income of \$6,292,000, compared with sales of \$38,654,000 and net income of \$1,369,000 for the second quarter last year. Quarterly earnings per share were \$0.30 this year compared with \$0.07 in the second quarter last year. For the previous quarter ended September 30, 1993, the Company's sales, net income and EPS were \$51,904,000, \$4,166,000 and \$0.20 per share, respectively.

New orders during the second quarter increased 40% from the first quarter, setting a new quarterly record for the Company. As previously reported, the book-to-bill ratio was higher than 1.3, reflecting broad strength in the Company's businesses. The Company includes both systems and service in its book-to-bill calculation.

New orders were particularly strong in the Company's wafer inspection unit, where demand for the 2100 series of in-line yield monitors reflected the increasing number of fabrication facilities which employed multiple KLA systems. The Company believes that, during the quarter, the number of fabs with multiple systems installed or on-order increased from 18 to 25, and that certain of these fabs increased the number of line monitors employed.

The Company's metrology division set a new order record for the quarter and the Company believes that it continued to increase its share of the optical overlay market.

KLA reported that all geographic areas were strong, with Japan and the U.S. each accounting for about one-third of the total new orders. The Asia Pacific and European regions accounted for the remaining one-third.

Gross margins increased to 43% during the second quarter, up from 40% in the first quarter. The improvement was primarily due to increased sales of the Company's wafer inspection systems. As the Company ramped up production of the 2100 series, it achieved manufacturing efficiencies. Improved financial results of the customer service division also contributed to the rise in gross margins.

KLA Instruments Corporation is the world's leading manufacturer of yield monitoring and process control systems for the semiconductor manufacturing industry. KLA is a publicly held corporation traded on The Nasdaq National Market under the symbol "KLAC."
